

HEATSAVR LIQUID POOL BLANKET

- ✓ Saves up to 40% off energy costs
- ✓ Helps reduce evaporation
- ✓ Fits any pool shape or size
- ✓ Safe, non-toxic and bio-degradable

HEATSAVR LIQUID POOL BLANKET

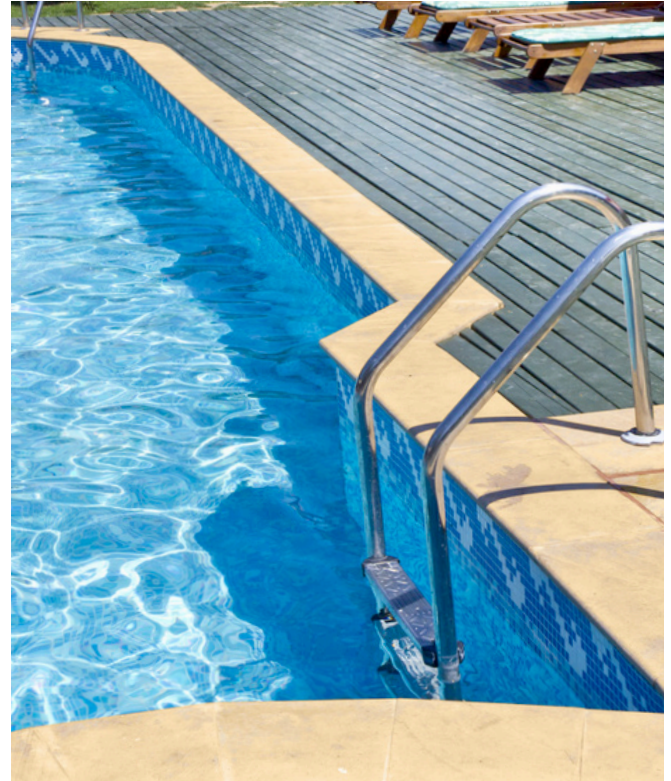

This unique liquid forms a barrier on the surface of the pool, preventing heat loss and evaporation, while you save up to 40% off your energy costs.

Unlike conventional pool covers, which have to be removed every time you use your pool, and put back on every evening, HeatSavr keeps your pool ready to use 24 hours a day, seven days a week.

When the HeatSavr is fed into your pool, the liquid forms a transparent monomolecular barrier on the surface. This barrier reduces evaporation which accounts for up to 80% of heat, energy and water loss, significantly reducing heating costs, saving water and leaving the pool warmer for longer. HeatSavr does not affect the chemical balance in the pool, is safe, non-toxic and bio-degradable.

HeatSavr can be applied daily by hand or can be automatically dosed into the pool using the RolaChem automatic dosing system.

To find out more about the HeatSavr or the RolaChem automatic dosing system refer to the product instructions at astralpool.com.au for further details.
